To Work in an environment Which encourages me to succeed and grew professionally where I can utilize my skills and knowledge appropriately.

## SKILLS

Languages:C,C++, JavaScript Programming :HTML, CSS Databases:MySQL, MongoDB

Frameworks:NodeJS, Express, React

## PROJECTS

**Pizza-Hut web-app**(<https://wzpizzashop-mern.herokuapp.com/>)

**Description-** This is a Full Stack pizza ordering app with stripe payment method with a dedicated Admin page to manage your all orders and products.

**Technology** - Node.js for the back-end and MongoDB for persistence and React for user interface.

**E-commerce website using MERN(wcart shopping-<https://shopping-wcart.herokuapp.com/>)**

**Description** - This is a full fetched **e-commerce** website to demonstrate my knowledge about **MERN**. Where existing users can choose different products and purchase it.

**Connection**-Here, with the help of NodeJS and MongoDB to create a backend server and create the user interface using React Library.

**Features :-**

Login(signin, signup, sign out), Add to cart items, Updated profile, Order section, Payment section.

### Portfolio website

**Description** - This is my own portfolio website. Here I describing my whole things about studies and experience also my skills.

**Technology used**-React, js, CSS, HTML

### Blog web

**Description**-This is basically node js, html, react based project.. In this project we learn basic thing about server and database how to fetch data, send data, how to connect with server etc..
